4-3:管理邮箱配额限制

1)邮箱酒鸡取制

如果不在用户级别做西额限制,那默认将遵从数据库级别的西额设置。

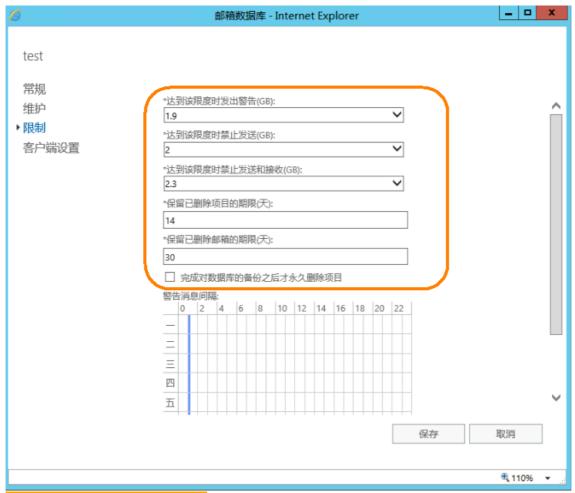

b、数据库级别

c、powershell方式设置单个用户配额限制

Set-Mailbox -Identity zengchuixin -IssueWarningQuota 20GB -ProhibitSendQuota 21GB -ProhibitSendReceiveQuota 22GB

Get-Mailbox -Identity zengchuixin | fl name,issuewarningquota,prohibitsendquota,prohibitsendrec eivequota

d、powershell方式设置数据库配额限制

Set-MailboxDatabase test -IssueWarningQuota 10GB -ProhibitSendQuota 11GB -ProhibitSendReceiveQu ota 12GB

Get-MailboxDatabase -Identity test | fl name,issuewarningquota,prohibitsendquota,prohibitsendre ceivequota

```
[PS] C:\Windows\system32>Set-MailboxDatabase test -IssueWarningQuota 18GB -ProhibitSendQuota 11GB -ProhibitSendReceiveQuota 12GB
[PS] C:\Windows\system32>Get-MailboxDatabase -Identity test | fl name,issuewarningquota,prohibitsendquota,prohibitsendreceivequota

Name : test
IssueWarningQuota : 10 GB (10,737,418,240 bytes)
ProhibitSendQuota : 11 GB (11,811,160,064 bytes)
ProhibitSendReceiveQuota : 12 GB (12,884,901,888 bytes)
```

通过使用加载CSV的方式, CSV里面定义数据库的列表名称或者定义用户名称。 也可以通过excel公式的方式提前编辑好命令。
